## Skill: 2 times table Year: 2 Encourage daily counting in multiples both forwards and backwards. This can be supported using a number line or a hundred square. Look for patterns in the two times table, using concrete manipulatives to support. Notice how 23 25 (26) all the numbers are 35 (36) 39 even and there is a pattern in the ones. Use different models to develop fluency.

#### Year: 2 Skill: 5 times table Encourage daily counting in multiples both forwards and backwards. This can <del>-00000</del>-00000-00000be supported using a number line or a hundred square. Look for patterns in the five times table, using concrete 15 12 13 16 14 17 18 manipulatives to 24 25 23 26 27 28 29 22 support. Notice the 34 35 36 37 38 32 33 39 pattern in the ones as well as highlighting the odd, even, odd, even pattern.

Encourage daily counting in multiples both forwards and backwards. This can be supported using a number line or a hundred square.

Year: 2

Look for patterns in the ten times table, using concrete manipulatives to support. Notice the pattern in the digitsthe ones are always 0, and the tens increase by 1 ten each time.

#### Year: 4

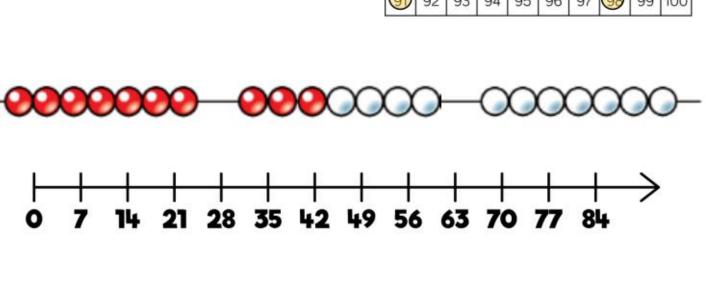

Encourage daily counting in multiples both forwards and backwards. This can be supported using a number line or a hundred square. Look for patterns in the nine times table, using concrete manipulatives to support. Notice the pattern in the tens and ones using the hundred square to support as well as noting the odd, even pattern within the multiples.

### Year: 4

Encourage daily counting in multiples both forwards and backwards, supported by a number line or a hundred square. The seven times table can be trickier to learn due to the lack of obvious pattern in the numbers, however they already know several facts due to commutativity. Children can still see the odd, even pattern in the multiples using number shapes to support.
