

July 2024

Allergies/Intolerances

Dear Parents/Carers,

If your child has a food allergy, food intolerance or a dietary requirement please ask the office for a special diets and allergy form so we can update your child's dietary requirements on our new system. Please note that these forms are NOT for general likes and dislikes, however are for requirements that need monitoring due to an allergy, intolerance or a preference including cultural.

Any previous dietary forms will not be in place in September 2024, please therefore ensure you complete a new form even if you have completed one previously.

Please return these forms by Friday 19th July or sooner, so we can take the next steps in caring for your child's dietary needs.

Booking food for children with allergies and intolerances

If your child has a dietary need that requires them to have a different meal, such as a gluten, dairy or egg allergy these menu options will be included in the daily menus within Parentmail at the bottom of the list of meal options. If your child does not have a dietary requirement but you order them a gluten free option, your child will be given the main meal. Special dietary options are only for those with agreed dietary needs.

Thank you for your continued support.

Regards,

School Catering Team
